

Biogas Support Programme. **Quality Standards of Appliances**. FY 2058/59.45p. BSP Lib Temp No. 64.

This document contains very useful information about the quality standards fixed by BSP on biogas appliances. Followings are the type of biogas appliances for which quality standard has been fixed:

- BSP standard for Biogas Stove - Part 1: General Requirements
- BSP standard for Biogas Stove - Part 2: Construction of Economy Type
- BSP standard for Biogas Stove - Part 3: Construction of Angle Iron Type
- BSP standard for Biogas Stove - Part 4: Construction of Deluxe Type
- BSP standard for Biogas Tap (with Varying Knob)
- BSP standard for Biogas Water Drain
- BSP standard for Dome Pipe
- BSP standard for Gas Pipe Line Adapter

Following criteria have been taken into consideration to determine quality standard for each of the above-mentioned appliances:

- Specifications
- Types
- Material part list
- Raw materials
- Construction details
- Recommended Manufacturing Process
- Workmanship and finish
- In process quality Control
- Performance test
- Sampling of the products for inspection
- Marketing
- Packing

If should be pointed here that if the aforesaid criteria as explained in detail in the booklet are followed carefully by the manufacturers of the appliances, there is no reason why quality standard of appliances cannot be ensured?
